

More Light on Armenian Affairs.

As will be seen by the special correspondence from Constantinople printed in another column, the Armenian revolutionary party has shown marked activity of late. Evidence of a formidable conspiracy has come to light, and pending the result of the inquiry into the alleged atrocities there seems good reason to believe that the Turkish government has merely taken measures to subdue revolt against its rule.

Our corresponden' has much that is interesting and instructive to say respecting the United States Minister in the Turkish capital. The charges that have been levelled against him are shown to be without foundation. Mr. Terrell's action has throughout been both correct and humane, and has been fully in accordance with his instructions from the State Department at Washington.
